## **CVI: publications, tools for habilitation and psycho-education**

In the links below you can find publications and downloads of The Bartiméus CVI expertise centre.

### **CVI documentary Video:**

Video: [Bartiméus What is CVI - YouTube](#)

### **MyCVI serious game**

Online psycho-education tool with information about CVI, the difficulties you may experience when you have CVI and ways of coping with these difficulties.

[www.mijn cvi.nl](http://www.mijn cvi.nl) (choose English)

### **CVI at a young age – animation for children**

Video: [CVI at a young age - explanation for children - YouTube](#)

### **CVI at a young age - animation for adults**

Video: [CVI at a young age - explanation for adults - YouTube](#)

### **Book: CVI Experience**

CVI Experience tries to allow people without visual impairment to experience the complexity of visual processing and visual perception. This knowledge and experience ensures greater empathy and understanding among everyone involved with children and adults people with CVI.

CVI experience consists of a book with explanation and a separate download with the exercises.

The book can be downloaded via this link:

[Book: CVI Experience \(English version\) - Bartimeus](#)

The exercises can be requested separately via this e-mail address:

[fpilon@bartimeus.nl](mailto:fpilon@bartimeus.nl)

### **Book: My child has CVI**

Handbook for parents of a young child with CVI. It gives parents tools and advice for coping dealing with the visual perceptual problems their child may experience daily, so that their child can develop as well as possible.

### **English teaching letters regarding ICT and CVI**

Students with CVI are often helped with custom application settings and computer accessibility tools such as screenreaders and magnification programs. In addition, custom formatting of information in a document or web page also helps to increase readability. The appendices contain a number of lesson letters to apply this at study, work or home.
